Attachments: Biosolids 2020 report data 71821.xlsx; Use and disposal summary 2020.xlsx

Hi Laleh,

Here is data submitted by major POTWs and other Class 1 Sludge Management Facilities (such as composters) in EPA Region 9 (except for AZ, which has been delegated EPA's biosolids program), and a summary of use and disposal in California. If you want a breakdown by contractor for those POTWs that hired contractors for land application or composting, I can put that together – let me know.

All tonnages are reported on a 100% dry weight basis, in metric tonnes.

Thanks,

Lauren

Subject: Biosolids management and beneficial use in California

Hi Lauren,

We are interested to know how and by whom biosolids are being managed and beneficially used in California. Could we have access to biosolids information reported to EPA in 2020?

Thanks,
Laleh
